

Lubricating Penetrant

Product Information

LIQUID BEARING Lubricating Penetrant is an all-purpose, extreme pressure lubricant that provides for smooth and long-lasting operation of metal mechanisms.

Benefits

Penetrates –Breaks through rust and corrosion.

Lubricates –Reduces friction and wear for smooth operation of sticky mechanisms.

Cleans – Removes corrosion from electrical contacts.

Protects - Leaves a protective layer of lubricant for long lasting lubrication, and corrosion resistance.

Directions

Remove excess rust and apply penetrant directly to fasteners and electrical contacts. Wipe with a clean cloth to leave a protective layer of lubricant on metal surfaces. Apply directly to moving mechanisms in automotive, agricultural, construction, marine or other applications wherever long-lasting lubricant protection is needed.

Non-pressurized pump applicator reduces overspray and waste

Applications

Mechanical – Fasteners, cables, chains, open bearings and gears, control system linkages,

Electrical - Battery terminals, electrical connectors, motors, switches.

Tools – Corded and battery-operated electric tools, impact wrenches and pneumatic tools.

Household – Hand tools, hinges, casters, locks, overhead and sliding doors.

Physical Properties

Physical State	Liquid
Colour	Colorless
Relative Density	0.8325 g/cm ³
Flash Point ASTM D-93	60°C
Pour Point (°C) ASTM D97	<-51°
Viscosity (cSt)	3.8 cSt at 40C
Odour	Non-objectionable

Safety Data

CAUTION: Use in well ventilated areas; Do not spray onto skin or eyes; Keep away from heat; Do not store at temperatures over 40C; Keep away from exposure to direct sunlight; Contains petroleum distillates. Avoid frequent or prolonged contact with skin. If swallowed, DO NOT induce vomiting. Call a physician immediately. **Keep out of reach of children.**

Made and packaged in Canada

Packaging

150 mL (5 fl. Oz.) bottle with pump actuator.
